Khaled Jaber

AI Solutions Consultant | Healthcare AI & Business Transformation |
MBA + Master's in AI | Ex-Johnson & Johnson | Building LLM Agents
& Workflow Automation | Python, LangChain

Land O' Lakes, Florida, United States

Summary

I spent 13 years leading healthcare commercial teams, a \$55M+ portfolio, a 13-person team, and five Best Achievement Awards at Johnson & Johnson — then made a deliberate pivot toward business transformation and technology. Today I'm completing a Master's in AI and building AI-powered solutions hands-on. What makes my background different is the combination: I understand the business and I build the solution. I led a specialty-pharmacy CRM migration that I delivered in 6 months instead of the planned 12 — authoring 700+ requirements, designing a weighted vendor evaluation matrix, selecting Asemlia, and keeping it HIPAA-compliant throughout. That's the lens I bring to AI: map the process, define the requirements, and ship something the business actually adopts. How I work with AI: I use modern AI-assisted development to ship quickly, while owning the architecture, requirements, integration decisions, debugging, and testing. I can explain my systems end-to-end and defend every technology choice. What I built: • LLM agents & RAG assistants (Python, LangChain/LangGraph, Anthropic/OpenAI APIs, pgvector) • Workflow & business-process automation with human-in-the-loop governance • Full-stack AI applications (React/TypeScript front-ends, FastAPI back-ends) — live on my GitHub

Background: Pharmacist (BS) · MBA · Master's in AI (in progress) · 13+ years healthcare/commercial leadership · U.S. enterprise business analysis (specialty pharmacy, HIPAA, AppFolio, Dynamics 365). Open to AI Solutions Consultant, Healthcare AI, Technical Product Manager, and AI Automation roles. On-site, full-time, no sponsorship required. Let's connect if you're turning business and healthcare problems into AI solutions.

Experience

Atlantis University
Fulltime Student

January 2026 - Present (9 months)

Land O' Lakes, FL

Building AI applications hands-on with modern AI-assisted development — LLM agents, RAG over a vector store (pgvector), prompt engineering, FastAPI/Python back-ends — owning architecture, integration, and testing.

Prototyped LLM-agent orchestration with human-in-the-loop approval/governance.

Built and deployed a RAG document assistant and a full-stack web app (see Featured).

JamEMR

Chief Executive Officer

January 2026 - Present (9 months)

Land O' Lakes, FL

Co-creating JamEMR, an AI-powered electronic medical record system with a native ambient scribe: it listens to the patient visit, transcribes and speaker-diarizes locally, and drafts the SOAP note for physician review and sign-off. All AI runs on-premise — patient data never leaves the clinic — making it a fit for privacy- and data-sovereignty-conscious healthcare markets.

Preparing a pilot in a neurology practice. Built hands-on with AI-augmented development: Python/FastAPI backend, locally deployed LLMs, speech pipeline with speaker diarization, and a human-in-the-loop attestation layer so nothing enters the patient chart without clinician approval.

KING TOWING AND TRANSPORT

Business Analyst/ project manager

June 2023 - May 2025 (2 years)

Coordinated workstreams across development and QA; gathered requirements, documented workflows, supported operational improvements (towing, transportation, heavy-equipment rental).

Coordinated with marketing teams across platforms to support conversion-funnel productivity.

Identified opportunities to leverage AI for claims-processing automation (Towbook, Tow Pilot).

TracFone Wireless, Inc.

Business Analyst/ UX UI designer

January 2023 - May 2023 (5 months)

Supported the eSIM activation initiative (BYOP and new-device paths); managed backlog, requirements analysis, UAT, and defect resolution in an Agile environment (Jira, TAS, SQL, Adobe XD).

Publix Super Markets

Business Analyst

May 2022 - October 2022 (6 months)

Lakeland, FL

Led selection and deployment of a Specialty Pharmacy CRM replacement; authored/managed 700+ requirements across architecture, security, dev, QA/ UAT, PM, and business teams.

Designed a weighted vendor evaluation matrix that drove the selection and implementation of Asembia.

Delivered in 6 months vs. 12 planned, HIPAA-compliant throughout.

XS Supply

Acquisition Manager

October 2021 - April 2022 (7 months)

Sourced surplus medical supplies for resale; managed customers/sales in CRM (MS Dynamics ERP); trained the team on medical product knowledge; contributed a functional role to IT systems/workflows.

Premiere Holdings LLC

Business Analyst/project manager

May 2021 - October 2021 (6 months)

Miami, FL

Integrated operations with AppFolio; designed workflows (work orders, leasing, tenant approvals, showings); built pro forma financial models supporting acquisition financing.

Johnson & Johnson

11 years

Business Development Manager

January 2017 - December 2018 (2 years)

Saudi Arabia

led market-access and business-development initiatives.

Sales Manager

January 2013 - December 2016 (4 years)

Saudi Arabia

Led a \$55M+ portfolio and ~15 team members through two supervisors; mentored multiple generations of reps.

Best Achievement Awards across J&J (2014, 2015).

Team Lead

January 2010 - December 2012 (3 years)

Saudi Arabia

Medical Sales Representative

January 2008 - December 2009 (2 years)

Saudi Arabia

Best Achievement Awards across J&J tenure (2008, 2009)

Education

Atlantis University

Master's degree, Artificial Intelligence · (January 2026 - August 2027)

Atlantis University

Master of Business Administration - MBA, Business Administration and Management, General · (June 2019 - May 2021)

University of Jordan

Bachelor's degree, Pharmacy · (October 1999 - June 2005)
